

Student Participative Management

Objectives

- To help students to enhance their leadership skill
- To give them a platform to learn management skills
- To motivate them to take decisions for the particular cell/ department

Practice

We believe students have great idea and the enthusiasm if they are given a platform to perform. With this thought, all cells are headed by the faculty member(s) but coordinated by the students. These cells include cultural, sports, extra-curricular, co-curricular & placements.

These student coordinators play central role. They help faculty coordinator(s) in planning, coordinating & executing events of their respective cells.
